

Gayathri Priya C V

React.js · JavaScript · Node.js · Full-Stack | 3+ yrs
Chamarajanagara, Karnataka

Software Engineer (3+ yrs) building production features end to end across the stack. Strong experience in React.js, JavaScript, Redux, REST APIs, reusable component development, responsive web applications, browser compatibility, and production issue resolution. Hands-on experience with Node.js, Express.js, MongoDB, PostgreSQL, MySQL and SQL, with project experience in full-stack development, RBAC/ABAC, AI/LLM integration and ETL workflows.

Technical Skills

Languages & Backend: JavaScript, Node.js, Express.js, Python, FastAPI, REST APIs, Socket.IO, JWT

Frontend: React.js, Redux, Redux Toolkit, React Router, HTML5, CSS3, Material UI, Chakra UI, Formik

Databases: PostgreSQL, MySQL, MongoDB, SQL, IndexedDB

System Design & Access Control: RBAC, ABAC, authorization middleware, multi-tenancy, audit logging

AI & Data: LLM/AI Chatbot Integration, Ollama, Pandas, SQLAlchemy, ETL, Apache Airflow

Tools: Git, GitHub, Docker, Azure DevOps, Postman, MongoDB Compass, ECharts, ApexCharts

Professional Experience

Lingotran Private Limited
Software Engineer (Trainee)

Dec 2022 – Present
Mysuru, Karnataka

- Own features end-to-end across a React.js/Node.js product, from implementation through debugging and resolving production issues — tracing incidents involving speech recognition, audio playback, browser compatibility and API behavior to root cause rather than treating symptoms.
- Designed and built an IndexedDB-based offline write-outbox to queue API operations during connectivity loss and reliably synchronize them once connectivity returns, improving resilience of learner-facing workflows.
- Integrated REST APIs using Axios for activity tracking, vocabulary, prompts, progress tracking and learner interaction workflows.
- Developed reporting and visualization features using ECharts and ApexCharts, along with client-side document and spreadsheet export utilities.
- Refactored speech functionality into a reusable SpeechModule architecture to centralize microphone UI, speech recognition, validation, feedback presentation, tracker updates, navigation and reusable speech utilities.
- Built reusable React components and application workflows using React.js, Redux, Redux Toolkit, React Router, Material UI and REST API integrations across desktop, mobile, tablet, iOS Safari and Android browsers.

Tech Stack: React.js, JavaScript, Redux, Redux Toolkit, REST APIs, Axios, HTML5, CSS3, Material UI, Web Speech API, IndexedDB, Git, GitHub, Azure DevOps, Docker

Projects

AccessFlow — Enterprise Identity & Access Management Platform

- Built a full-stack Identity & Access Management platform using React.js, Node.js, Express.js, MongoDB and JWT.
- Implemented authentication, authorization, RBAC, role hierarchies, permissions, ABAC, multi-tenancy and audit logging.
- Developed authorization middleware and a permission simulator to evaluate authorization decisions across roles, permissions and attributes.

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

EduSync ETL — Data Engineering & Analytics Pipeline

- Built an Extract → Transform → Load pipeline using Python, FastAPI, PostgreSQL and Pandas.
- Implemented modular extraction, transformation and loading workflows using SQLAlchemy and SQL.
- Integrated Apache Airflow for workflow orchestration and scheduled ETL processing.

Tech Stack: Python, FastAPI, Pandas, SQLAlchemy, PostgreSQL, Apache Airflow, SQL, React.js

Student Management ERP

- Built a full-stack student management application using React.js, Node.js, Express.js and MongoDB.
- Implemented CRUD workflows for students, courses, marks and academic information.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, REST APIs

AI & Intelligent Application Experience

- Integrated an AI-powered support chatbot into an application for conversational assistance and user support.
- Worked with Ollama and cloud-based LLM integration as part of chatbot architecture and application workflows.
- Implemented conversation state and response processing and investigated reliability issues including duplicate AI responses.

Education

B.E. in Computer Science and Engineering	2021
Government Engineering College, Chamarajanagar	

Target Roles

Software Engineer | Full Stack JavaScript Developer | React + Node.js Developer | MERN Stack Developer | Backend Engineer (Node.js/Python) | AI-Enabled Application Developer
